A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1)⊠	Responsive to communication(s) filed on <u>13 D</u>	ecember 2005.					
• —	•	action is non-final.					
<i>,</i> —	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
,	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Dispositi	on of Claims	•					
4)🖂	Claim(s) <u>1,4,5,7-9,12 and 13</u> is/are pending in	the application.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4-5, 7-9 and 12-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Ichida et al. (6,851,976).

Regarding claim 1, Ichida et al., figures 8 and 9 show a female terminal comprising:

- a terminal-inserting portion having a bottom wall (41, with an up side down of figure 8, the Examiner can consider that 41 is a bottom wall) and a resilient contact piece portion (38) extending rearwardly from a front end edge (not labeled) of the bottom wall to a free end portion (not labeled); and
- a convex portion (not labeled, figure 9) projecting toward the bottom wall is
 formed at the free end portion, when the resilient contact piece portion is
 resiliently deformed upon insertion of a male terminal (not shown), the convex
 portion is brought into contact with the bottom wall;

wherein the resilient contact piece portion including a first curved portion (39) by which the male terminal is clamped; and

wherein the resilient contact piece portion including a beginning portion (not labeled) extending from the front edge to the first curved portion and an intermediate portion (not labeled) extending from the first curved portion to the convex portion, that are provided substantially in parallel to the bottom wall at a predetermined clearance, so that the resilient contact piece portion extends substantially parallel to the bottom wall except for the first curved portion and the convex portion.

Regarding claim 4, figure 8D, a second curved portion (43) on a top wall (36) of the terminal-inserting portion.

Regarding claim 5, the first and second curved portions are opposed to each other.

Regarding claim 7, a third curved portion (42, figure 8) is formed on the bottom wall at a position corresponding to the first curved portion.

Regarding claim 8, the convex portion having a semi-arc shape in cross-section.

Regarding claim 9, the convex portion is spaced from the bottom wall when the male terminal has not been inserted (figure 8).

Regarding claim 12, the first curved portion and the convex portion are spaced apart from each other by a predetermined distance.

Regarding claim 13, two end support points of the resilient contact piece portion are formed so that a distance between the two end support points is kept constant upon insertion of the male terminal.

Response to Arguments

3. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 5. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh-Tam T. Le whose telephone number is 571-272-2094. The examiner can normally be reached on 7:30-5:00.

Application/Control Number: 10/779,880 Page 5
